

# West India Quay Pedestrian Movement Analysis

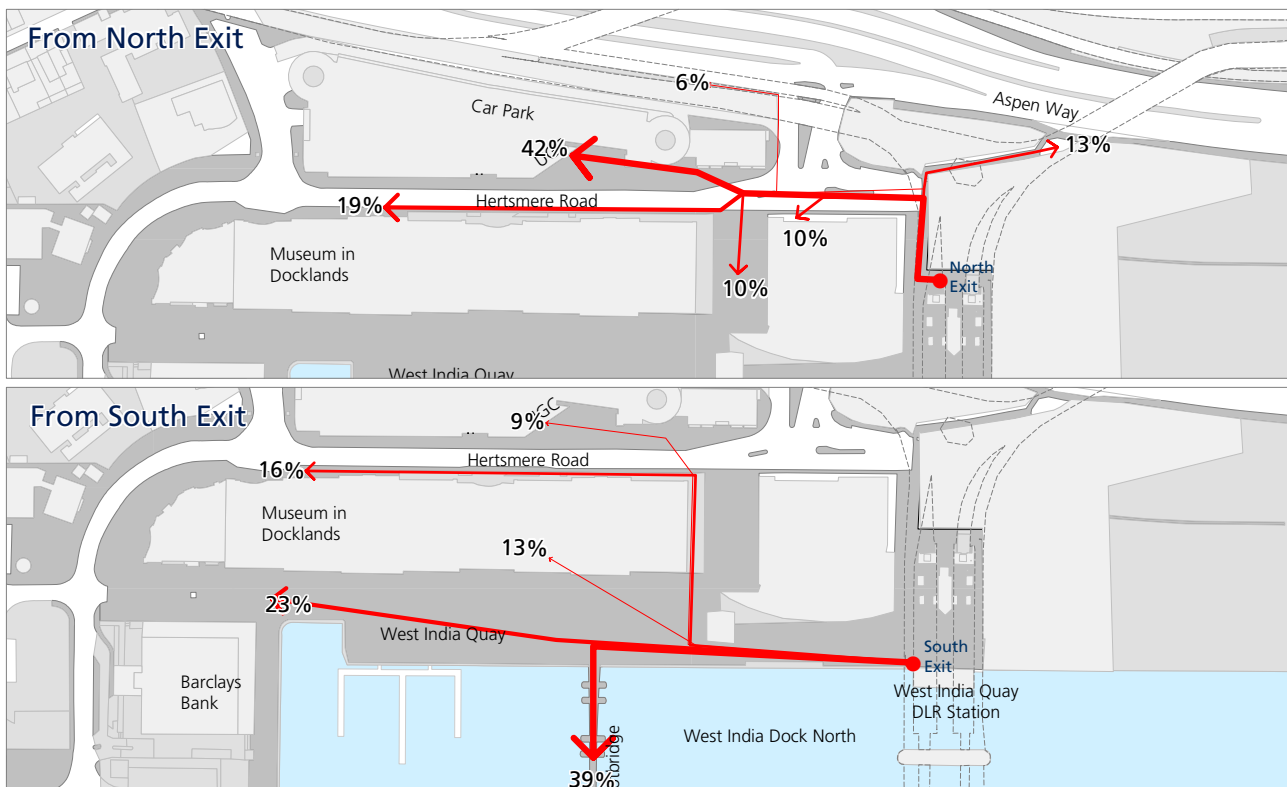

*A pedestrian flow survey and public space design guidance*

CLIENT	DOCKLANDS LIGHT RAILWAY LTD. AND TRANSPORT FOR LONDON
PARTNER	J AND L GIBBONS
LOCATION	LONDON
YEAR	2004

Intelligent Space carried out a pedestrian observation study around West India Quay station on the Docklands Light Railway. The study was commissioned in order to inform the landscape strategy at an early stage by identifying how pedestrians are currently using the area and providing conclusions about potential public space enhancements. In conjunction with the observation study, Intelligent Space carried out a public space audit to show the potentials of the site and highlight key barriers to pedestrian movement.
